

Shelter Shutters Operation Instructions

Single Fold Shutter

To Close SHUTTER

#1. With your fingertips, grab the shutter on the label side anywhere along the length of the shutter (top, bottom or middle). Pull toward you to release the shutter from its stowed position.

#2. Fold the shutter over the glass.

#3. Push the shutter until it makes contact with the door so the magnets inside the shutter engage and hold the shutter over the window.

To Open SHUTTER

#4. With your fingertips, grab the shutter on the label side anywhere along the length of the shutter (top, bottom or middle). Pull toward you to release the shutter from its closed position.

#5. Fold the shutter back to the stowed position until magnets engage.
