(Left to Right) within Frame

1. _____

Step 2: Measure Length
within Frame. (Top to Bottom)

2. _____

Step 3: Measure
Frame Face.

3. _____

Step 4: Measure
Frame Face.

4. _____

Step 5: Measure
Frame Face.

5. _____

Step 6: Measure
Frame Face.

6. _____

Step 7: Measure Length
within Frame. (Top to Bottom)

7. _____

Step 8: Measure
Frame Face.

8. _____

Step 9: Measure Length
within Frame. (Top to Bottom)

9. _____

Step 10: Measure
Frame Face.

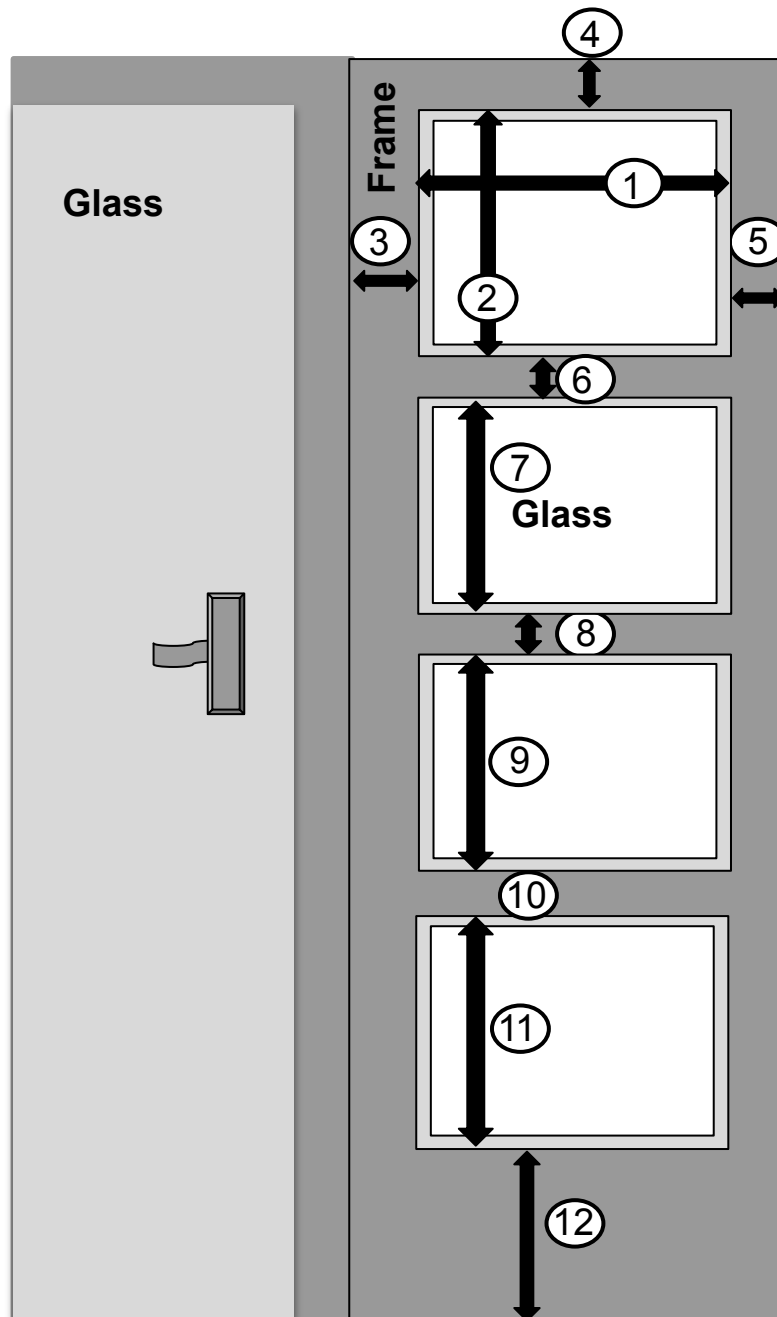

10. _____

Step 11: Measure Length
within Frame. (Top to Bottom)

11. _____

Step 12: Measure
Frame Face.

12. _____

Name _____ Phone _____

Street _____ City _____ State _____ Zip _____

Most sidelight and interior facing school windows have a steel frame which is ideal for Shelter Shutters. If the frame around the glass is not steel, we can provide thin steel adhesive plates to be adhered to the aluminum or non ferrous surface where the shutters magnets meet the metal.
